SNOW HELMET

Please read in full and retain for future use.

Hey! Please read this manual before riding with your new Torpedo7 Snow Helmet.

Thank you for choosing this Torpedo7 product. We construct our products to meet the highest standards for performance and safety. When given the correct care and maintenance, this product will be useful for many years to come.

Before First Use

- Before first use, remove any stickers or similar from the snow helmet
- Dispose of any plastic bags as they pose a risk of suffocation to young children.

Please read this manual before wearing these snow helmet and keep it in a safe place for future reference. If the snow helmet are transferred to a new owner, the manual should also be provided to the new owner.

Features

- Impact absorbent liner
- Quick release system
- Plush ear pads
- Dial fit system
- Goggle fit system

Important Safety Measures and Precautions

- A helmet must be correctly worn and maintained to provide protection. Carefully read and follow these instructions

- Ride safely. A severe impact, sharp object, improper use, or incorrect adjustment could cause injuries or death.
- Make sure your helmet is designed and intended for your type of snow riding.
- Anything between your head and the helmet can reduce the protection. A cap, scarf, or even some high-volume hairstyles might allow the helmet to move during an impact. Barrettes, headphones, or anything else under your helmet can injure you if the helmet is impacted.
- Do not modify the helmet. No attachments should be made to the helmet except those recommended by the helmet manufacturer. This includes stickers or adhesive labels.
- Avoid choking. This helmet should not be used by children while climbing or doing other activities where there is a risk of hanging or strangulation if the child gets trapped whilst wearing the helmet.
- Ventilation holes may allow helmet penetration. Sticks, stones, or insects can pass through the holes into the interior of the helmet.
- The helmet is designed to be retained by a strap under the lower jaw. Test the adjustments before every ride.
- Keep your helmet clean. Wash it with mild soap and water. The pads are machine washable in cold temperature, gentle cycle. Do not put pads in the dryer.
- Avoid high heat, such as inside a car on a sunny day. Excessive heat can damage the liner or shell, or make them come apart.
- Avoid chemicals. The helmet may be damaged and rendered ineffective by petroleum and petroleum products, cleaning agents, paints, adhesives and the like without the damage being visible to the user.
- Replace an old helmet or a helmet with damage. The helmet is designed to absorb shock by partial destruction of the shell and liner. This damage may not be visible. Therefore, if subjected to a severe blow, the helmet should be destroyed and replaced even if it appears undamaged.
- The helmet has a limited lifespan in use and should be replaced when it shows obvious signs of wear.

Use and Care

Check Helmet Size

- Some models of Torpedo7 helmets offer different sizes to fit different head sizes. To check for the right size, put it on your head and adjust the rear fit system. A good fit is snug, but not tight.

Adjusting Fit

1. Place the helmet on your head. It should be level so that it sits just above your eyebrows and covers your forehead. Unlock the strap dividers.
2. On the left side, hold the buckle under your chin, and slide the strap divider just beneath your earlobe. The straps should sit flat against your head. Lock the strap divider.
3. From the right side of the helmet, pull any left-side slack across the back of the helmet. Then repeat Step 2 on the right side.
4. Make sure the chinstrap is correctly threaded through the right buckle, and fasten the buckle. To keep the chinstrap from loosening or flapping, it must be tucked through the keeper.
5. Make sure the buckle is correctly fastened: Listen for a click as the buckle engages. Attempt to pull the buckle apart with the chinstraps. It should not come apart.
6. Adjust the chinstrap so that it is positioned snugly against the bottom of your jaw.

Cleaning and Maintenance

- Store in a cool, dry place when not in use.
- Dry in a well ventilated area away from direct sunlight or heat sources.
- Storage temperatures should not exceed 30°C.
- Clean your snow helmet using only lukewarm soapy water, rinse and then leave it to dry away from direct sunlight.

- Do not use excessive force when cleaning.
- Do not use chemical products such as solvents or detergents to clean the snow helmet.
- Always store your snow helmet in the bag provided. This is the only way to ensure your goggle lens remains undamaged for as long as possible.
- Please also note that your snow helmet should not be stored in places where they will be subject to high levels of radiating heat. Storage in temperatures above 50°C is not recommended.

Warranty

- Retain your receipt as proof of purchase.
- Inspect your snow helmet before the beginning of a season or after a fall to ensure they are still intact. The lens must not be split, the strap must be securely fastened to the frame and the frame should not have any cracks in it. In the event that any such damage is found, the defective part must be replaced.

We live and breathe outdoor sports, so we know that the time you spend pursuing them is precious. We're here to help you make the most of that time and want to ensure that you have fun and stay safe while enjoying the outdoors. Rest assured that all gear we sell is backed by our minimum 12 months warranty, this covers all manufacturing faults and defects - if you have an issue with gear purchased from us, we promise to do all we can to get you back outside as fast as possible.

The Consumer Guarantees Act and Fair Trading Act provide the basis of Torpedo7's Warranty policy. The Consumer Guarantee Act sets out minimum standards for goods sold by Torpedo7 Ltd. In the event that goods sold are not fit for purpose, or are faulty, the customer has the right to a repair, replacement or a refund.

The Fair Trading Act is designed to protect the customer from being misled, either intentionally or unintentionally. This applies to all aspects of the promotion and sale of goods and services including: pricing, where the product was made, where the product is from, the

meeting of New Zealand safety standards, availability of products in store and the sales techniques used. The Commerce Commission enforces the Fair Trading Act 1986.

Torpedo7 products have a minimum 12 month warranty from date of purchase. Warranty claims cover any fault, defect or failure occurring as a result of the manufacturing process. Damage or faults occurring as a result of misuse, accident or wear and tear are not covered by our warranty policy.

If the product is still under warranty then the repair will be at our expense including the freight to return the repaired or replacement product. If the product is out of warranty, then we can still have the product repaired, however, the cost of the repair will be charged to the customer.
